Have a mold-related question? We have the answer! Check out our FAQs below to learn more about our company and services. Black mold, also known as Stachybotrys chartarum, is typically dark green or black in color and often has a slimy texture. It usually grows in areas with excessive moisture. The best way to determine if mold is black mold is through professional testing by a mold inspection specialist.Yes, mold can cause health issues, especially for individuals with allergies, asthma, or weakened immune systems. Exposure to mold can lead to symptoms such as coughing, sneezing, respiratory problems, skin irritation, and headaches. It's important to address mold promptly to protect your family's health.Signs of mold include a persistent musty odor, visible mold spots, or increased allergy-like symptoms among occupants. Mold often hides in damp areas like basements, bathrooms, and attics. If you suspect mold, it's best to have a professional inspection to accurately detect any hidden mold.Yes, it is generally safe to be in your home after mold treatment, especially if performed by certified professionals. Mold Warrior uses non-toxic methods, and we ensure that all mold is properly removed and the air quality is improved before declaring the space safe for re-occupancy. At Mold Testing Kansas City, we are dedicated to protecting your health and property through expert mold inspection and analysis. Our mission is to deliver trustworthy, accurate results while prioritizing your safety and peace of mind. 188 Hood Avenue, Suite 101 325 Maple Street, Building 2 +1-816-555-1234 info@moldtestingkc.com Single or Multiple Levels Our mold detection dogs are trained in the same facility as FBI drug and bomb-sniffing dogs. Our dogs don't care who is paying the bills. They have no motive to cheat and are rewarded for good performance only. We have two different processes, the human inspection with electronics and the advance dog inspection. Our certified inspectors will let you know if you have mold. And our dogs will make sure we don't miss a thing. A simple inspection can save you thousands of dollars while making your home safe and more comfortable. Commercial and Residential mold inspection and removal company Dog Gone Mold features the area's only mold-fighting "Wonder Dog." You'll get guaranteed mold detection and remediation services. You'll be 100% satisfied, and we guarantee our work in writing. This is nearly unheard of in the industry. Our certified inspectors will let you know if you have mold. And Mason will make sure we don't miss a thing. A simple inspection can save you thousands of dollars while making your home safe and more comfortable. We never use bleaches or chemicals. We use only organic, all natural cleaning products. They're safe for pets and kids. 100,000 mold spores can fit on the head of a pin. By the time you see signs of mold, you're seeing millions, or even billions, of potentially harmful spores. But we will find the mold where it lives and remediate your problem. "Thank you Dog Gone Mold for getting our mold issues resolved quickly and efficiently. We also thank you for quoting us a fair price and backing your work up with a one-year warranty." Tom & Dorothy A "I really appreciate your honesty and ethical business approach. Unlike the other companies I consulted, you did not use scare tactics to sell me services. I also really appreciate your comprehensive approach to mold using common sense above all else. I am impressed." Crystal C. "Following a record-breaking rain, we called Dog Gone Mold to inspect our showroom basement - to make sure the area was safe for all of our employees and customers. The inspectors arrived with their mold-sniffing dog "Mason," and discovered a couple areas that required additional testing. They made all the arrangements for their certified contractors to do all the work, ensuring the entire area was masked off from the rest of our showroom. They provided a detailed report stating we were mold free and guaranteed for a year. I highly recommend Dog Gone Mold for anyone wanting to make sure their home or business is taken care off!" Mary Madden The individuals in the area of Kansas City, Missouri that are worried about indoor mold growth damaging their personal belongings and negatively impacting the health of themselves and those around them no longer have to worry as they have a partner in the fight against mold! MI&T offers unbiased Kansas City mold testing without a conflict of interest. Our certified inspectors will answer all the questions that you have about these frustrating problems and find out once and for all whether you have a mold issue or not. Our sample collection offers accurate evidence of exactly what you are breathing in on a daily basis. We get you answers by conducting mold testing along with a complete visual inspection by our technician. Free mold inspections do not include this service and are quite simply just guessing at what is going on in your home. Air sample collection gives you factual evidence about the current state of your air quality. We can gather samples of air from areas you smell or see something out of the ordinary. If there are small indications of water intrusion on a wall we can do in-wall samples to conclude if there is a issue/problem beneath the surface. Surface sample collection is used when visible mold growth is present. Certain species of fungus are not easily airborne unless disturbed; this includes the [dreaded/fearred] toxic black mold stachybotrys. Identifying the species present is crucial in determining whether or not the issue could be handled by yourself or requires professional intervention. Schedule Appointment Inspection Performed Samples Collected Sent To Independent Lab Report With Findings Major Metro Served: How long have you lived here and what do you like most about living in this area. I have lived in the area for about 32 years. I love the four seasons of Kansas and the cost of living. My family lives here and I have a small farm that I truly enjoy. What do you like most about being a mold inspector?: Mold Inspections have fascinated me since the beginning, so I decided that I would focus on doing only mold inspections. Mold can cause serious problems for people who live in the house. I truly enjoy helping my clients find out if the problem is bad and what they can do about it. Describe an inspection that you are particularly proud of: (Specifics on mold issue, Client relationship, What was rewarding about it) Several years ago, I was hired to inspect an apartment for a young lady that lived with her infant daughter. As I approached the home, I could smell the pungent odor of mold and knew that it was not a good situation for someone to be living in. I inspected the apartment from top to bottom and tested in the areas that showed visible growth growing and even mushrooms in the kitchen. I was able to determine that the source of the moisture was a roof-boot leak in the wall between the kitchen and the bathroom. Because of the work of MI&T and my report she was able to have the property properly remediated. Doing a job that really helps people be more safe and have a better life is truly satisfying. Why should a prospective client choose you to perform their mold inspection?: Clients choose me because I listen to them, do a good job inspecting, maintain professional boundaries and attitudes, and give them the information they need. They can tell that I am truly interested in their welfare and that I know the field well. Recent Water Damage Post Mold Remediation Clearance Visible Growth Strange Smell Health Complications Peace of Mind Real Estate Transaction Litigation Mold Inspection & Testing Kansas City Missouri For clients that do have elevated levels of mold in their home, we provide a comprehensive protocol for restoration. This includes a step-by-step procedure for how the remediation should be handled and who should be doing the work. Mold remediation is different than a typical remodeling job. When removing contaminated materials, you are sending thousands of mold spores into the air. For this reason, problem areas should be contained and equipped with an airscrubber while work is being finished. After contaminated materials are removed, walls must be hepa vacuumed and treated with antimicrobial solutions and sealants. These are things that professional remediation companies have the capabilities of doing that a normal handyman would not. If this type of work is attempted by someone without the proper experience, there is a good chance they will only further the air quality issues within the property or business. When dealing with these types of issues in your house or business, you want to make sure that you hire a company without a conflict of interest. Hiring a Kansas City mold remediation company to finish an inspection is an example of what you don't want to do. These companies often offer free inspections to get their foot in their door to pitch a larger, more costly job. As we already mentioned, sometimes clients have results that come back with no problem at all or one small enough to be handled on their own. A visual inspection could never tell you these types of details and some mold removal companies would not pass up the opportunity for work by letting you know your concerns are unwarranted. Here at Mold Inspection & Testing Kansas City we operate under a strict code of ethics. Our inspectors are the best at determining whether or not you have a issue, where the source is, and giving you expert advice on how to remedy it. So if you are worried about your indoor air quality, call the company you can trust at 913-912-4577. Pure Air KC has managed to perfect the dry fog process to rid your home of mold. Using our patented two-step system, even the most difficult mold problems can be resolved in only a few hours.
