Sydney Airport serves Australia's largest city, known as Sydney, and is also the busiest airport on the continent, with well over 44 million passengers per annum. The airport is commonly referred to as the Kingsford Smith Airport, in honour of Charles Kingsford Smith who was a pioneering Australian aviator, or even as the Mascot Airport, due to its location in this suburb of Sydney. Sydney Airport's official IATA code is SYD and its ICAO code is listed as YSSY. Sydney is a major hub for airline companies such as Qantas, Virgin Australia and Jetstar, and is the largest terminal building, fully equipped for the needs of arriving and departing passengers, and three runways. Sydney Airport is located approximately 8 km from the Central Business District of Sydney, and on the northern coast of Botany Bay. The airport is particularly nearby the areas of Randwick, Canterbury, Rockdale, Huntersville, Le Perouse and Bankstown, and is also bordered on the western side by an inlet from the bay, known as Cooks River. By road, the airport is easily accessible from the M1 Southern Cross Drive, which runs to the city, and the M5 South Western Motorway provides a link to the south western suburbs. Areas surrounding Sydney include Cessnock and Newcastle to the north, Ingleburn and Wollongong to the south and Bathurst and Lithgow to the north-west, while the Tasman Sea edges the city on the eastern side. Sydney is also just north of Melbourne, home to the second largest airport in Australia. Sydney Airport provides the most important of Australia's air gateways, especially with regards to international traffic, as in recent years; it has handled approximately 45% of all international passengers on the continent. The airport is a popular arrival point for both business passengers and tourists, as millions of visitors come to enjoy Sydney's attractions each year, which include its famous opera house, the Sydney Harbour Bridge and the spectacular beaches in the area. Sydney Airport is currently in the top thirty busiest airports in the world, and has been awarded a top 5 position at the prestigious Skytrax Airport of the Year Awards. The busiest domestic route from Sydney is to Melbourne, with over 9 million passengers per year, and mainly by the airline carriers of Qantas, Jetstar and Virgin Australia. This route is considered to be the 4th most traveled in the world. Other busy domestic routes are those to Brisbane Airport, Gold Coast Airport, Adelaide Airport, Perth Airport and Canberra International Airport. Qantas handles many of the busiest international routes from Sydney Airport as well, which include to Auckland Airport, Hong Kong International Airport, Los Angeles Airport and London Heathrow. Virgin Atlantic Airways is another airline company with flights to Hong Kong and London. Additional important airline companies at Sydney Airport include Air Canada, Air China, Air New Zealand, Cathay Pacific, British Airways, Delta Air Lines, Emirates and Singapore Airlines. A number of prospective airline carriers, such as AirAsia X and Qatar Airways, seek routes to Sydney Airport as well. Sydney Airport handles a significant quantity of Australia's cargo movements per annum, and is served by the cargo airline companies of Australian Air Express, DHL Express, Cathay Pacific Cargo, Qantas Freight, Singapore Airlines Cargo and FedEx Express. The freight terminal is located to the north of the International Terminal, and a building that used to be a fourth passenger terminal at the airport is now used as offices for DHL Express and Tasman Cargo Airlines. Sydney Airport handles over 450,000 tonnes of cargo per annum. The airport of Sydney is one of the oldest continually operated airports in the world, having begun its operations between 1920 and 1930. Nigel Love, a former wartime pilot, originally established the airport as a private concern, but when the lease period of the land expired, the federal government compulsorily acquired it. Regular flights began in 1924, and in 1933, the first gravel runways were built. The second runway to be built was the 16R, jutting out into Botany Bay, and is currently the longest operational runway in Australia, with a length of 4,400 meters. The airport's international terminal was opened in May, 1970, by Queen Elizabeth II, and was also expanded in 1992. More recently, the international terminal has also received a \$500 million renovation, which included a new baggage system and a further 7,300 square meters of shopping space and facilities. Other recent important developments include runway safety areas that have been constructed at the ends of each of the current three runways, providing an extra margin of safety for passengers should an aircraft land short, or overrun the runways. The safety areas were essential for the airport's compliance with international safety standards. Expansion of Sydney Airport will continue over the next fifteen years to include a new multi-level car park, larger domestic and international terminals and an extra high-rise office block. The passenger terminals of Sydney Airport are named as Terminal 1, 2 and 3, of which Terminal 1 is the International Terminal, comprising of three levels, 30 departure gates and 200 check-in desks. The terminal can accommodate the Airbus A380, which flies to Singapore. In this terminal, arrivals, departures and airline offices are each dedicated a level for their operations. The international terminal covers a total area of 254,000 square meters. Terminal 2 and 3 are the domestic terminals, with a vast array of facilities, including a number of VIP lounges, and are within walking distance of one another. A transfer by bus, train or tax will be needed in order to travel from either of these two terminals to the international terminal. Further facilities at Sydney Airport include a business and conference services, medical centers, banking services, numerous airport cafes and restaurants and facilities for disabled passengers and families with young children. Since that Sydney Airport is located in such a densely populated urban area, it follows a strict curfew, with no aircraft landings or take-offs during the hours between 23:00 and 06:00, apart from a few exceptions. General information is available from the various information desks found within the terminal buildings of Sydney Airport, including Tourism NSW Information Desks. SYD is the official IATA code for Sydney Airport. Sydney Airport is also known as Kingsford Smith It is possible to enter the following GPS coordinates -33.94611, 151.17722 to aid you in your travelling to and from Sydney Airport. SYD Airport Map Topics:If you're planning a trip through Sydney, make sure to familiarize yourself with the layout and amenities of Sydney Kingsford Smith Airport. This bustling hub offers a variety of terminals, each with its own unique facilities to ensure a smooth and enjoyable travel experience or arrival terminal at Sydney Airport? Select it from the list of terminal maps below, and use the interactive map to find all available amenities, and even navigate to them, or to another terminal if you're connecting at the airport. SYD Terminal Map SYD Terminal 2 Map SYD Terminal 3 MapSYD Airport Terminal Map: First, scroll down on the page to the map image. Then, tap or click on the map image button to choose your terminal or locate parking facilities. A window will open with an interactive map, allowing you to pan and zoom to a specific terminal or concourse, gate, or amenity. You can also use the search feature to highlight the location on the map of gates, restaurants, lounges, security checkpoints, baggage claim areas and more. In addition, get directions from one location to another, which is very handy when you know your arrival and departure gate for a connection!IMPORTANT: If using a mobile phone, please check that you are using the latest software (e.g. iOS) version for the best results. SYD Airport features three main passenger terminals: Terminal 1 for international flights, and Terminals 2 and 3 for domestic flights. Terminal 1 is located separately from Terminals 2 and 3, which are adjacent to each other. If you're transferring between international and domestic flights, consider the transfer time that might extend up to an hour, as you'll need to travel between these terminals. Here are some tips for navigating inside the terminals:Terminal Layouts: Terminal 1 is split into Pier B and Pier C, with gates numbered from 8 to 37 and 50 to 63, respectively. Terminal 2 serves airlines like Jetstar and Virgin Australia and has 20 aerobridge-equipped gates. Terminal 3, primarily serving Qantas, also features easy bridge gates and is known for its expansive Qantas Club Lounge.Services and Amenities: Each terminal offers a range of services including lounges, dining areas, and shops. Terminal 1 has undergone significant upgrades to include more intuitive layouts for duty-free shopping and dining. All terminals are equipped with clear signage to help you find your way around.Overhead Moving Belts: Moving belts at Sydney Airport are located at each of the three terminals. Passengers can easily locate the baggage claim area by following the signs or asking the staff for assistance. The baggage claim area is equipped with conveyor belts that transport the luggage from the plane to the passengers. Once the luggage arrives, passengers can collect their bags from the designated carousel. It is important to check the luggage tag to ensure that you are collecting the correct bag.Above this Page: Please note that while we strive to keep the content on this page current and accurate, we cannot guarantee it due to the ever-changing nature of airports and airlines; for more details about our data and practices, refer to our Trust & Transparency statement. To report any data issues, use our feedback form.How do I move between SYD's international and domestic terminals?Terminal 1 operates international flights while Terminals 2 and 3 handle domestic flights. Transfers can take up to an hour. Smith Airport, is the primary international airport serving Sydney, Australia. Located 8 km south of the city center, it is one of the world's oldest continuously operating airports and the busiest airport in Australia, handling over 6 million passengers annually. Find your way to the Plaza Premium Lounge for a quick recharge or savor gourmet bites at Taste of Australia. Retail therapy awaits at Heinenmann Duty-Free, featuring Australian specialties. Need convenience? Grab essentials at Relay and Tech2Go or relax at the Airstide Express Spa. From luxury lounges to practical amenities, Sydney Airport Terminal has everything to make your journey smooth and enjoyable. Sydney Airport Terminal 1 International Departures is located on the departure level of Terminal 1. It features check-in counters, security screening, passport control, duty-free shopping, and departure gates for international flights. Passengers should arrive at least 3 hours before their scheduled departure time. Sydney Airport Terminal 1 International Arrivals Mezzanine is an area located above the main arrivals hall in Terminal 1. It houses various services including currency exchange, travel information desks, and meeting points for arriving passengers. The mezzanine provides a convenient space for greeters and transport providers. Sydney Airport Terminal 1 International Arrivals is the main entry point for international travelers. It features customs and immigration processing, baggage claim areas, and quarantine inspection. After clearing these procedures, passengers can access ground transportation options, including taxis, buses, and trains. Sydney Airport Terminal 2 Domestic Check-In is located on the ground floor of Terminal 2. It provides check-in counters and self-service kiosks for domestic flights operated by various airlines. Passengers can check in, drop off baggage, and obtain boarding passes before proceeding to security screening. Sydney Airport Terminal 2 Domestic Departures is situated on the upper level of Terminal 2. It includes security screening areas, departure gates, and various shops and dining options. Passengers can access their boarding gates and wait for their domestic flights in this area. Sydney Airport Terminal 2 Domestic Arrivals is located on the ground floor of Terminal 2. It features baggage claim carousels, car rental desks, and ground transportation options. Arriving passengers can collect their luggage and easily access taxis, rideshare services, or public transportation. Sydney Airport Terminal 3 Domestic Departures is dedicated to Qantas domestic flights. It offers check-in facilities, security screening, departure gates, and various amenities for passengers. The terminal provides a streamlined experience for Qantas travelers flying within Australia. Sydney Airport Terminal 3 Domestic Arrivals caters to passengers arriving on Qantas domestic flights. It includes baggage claim areas, ground transportation options, and various services for arriving travelers. Passengers can easily connect to other parts of Sydney or transfer to international flights from this terminal. Sydney Airport Terminal 3 Domestic Administration refers to the office areas within Terminal 3. These spaces are used for airline operations, airport management, and other administrative functions. While not typically accessible to the public, they play a crucial role in the terminal's daily operations. Sydney Airport Terminal International Parking is located near Terminal 1. It offers both short-term and long-term parking options for international travelers. The parking area is connected to the terminal by pedestrian walkways and provides convenient access for passengers and those picking up or dropping off travelers. Sydney Airport Terminal Domestic Parking serves Terminals 2 and 3. It provides various parking options, including short-term, long-term, and valet services. The parking facilities are within walking distance of the domestic terminals, offering convenience for passengers traveling on domestic flights. Printable Sydney Airport Terminal Map PDF 2024Download T2 and T3 are domestic terminals at Sydney Airport. T2 is a common-use terminal serving multiple airlines including Virgin Australia, Jetstar, and Rex, while T3 is exclusively used by Qantas for most of its domestic operations. Both terminals offer various amenities such as shops, restaurants, and lounges for passengers. Terminal 1 at Sydney Airport serves all international flights and select domestic flights. Major airlines operating from T1 include Qantas, Emirates, Singapore Airlines, Air New Zealand, and United Airlines. The terminal also hosts numerous other international carriers, providing connections to destinations worldwide. Sydney Airport has three passenger terminals. These consist of T1 International Terminal, which handles international flights, and two domestic terminals: T2 Domestic Terminal, used by multiple airlines, and T3 Domestic Terminal, primarily used by Qantas for its domestic operations. You cannot walk directly from T3 to T1 at Sydney Airport due to the significant distance between them. The terminals are approximately 4 kilometers apart, making walking impractical. Passengers must use the free T-Bus shuttle service or other transportation options like taxis or rideshares to transfer between these terminals. Want a chance to WIN AUD \$1 million in cash? Spend \$50 or more at Sydney Airport to enter for a chance to win AU \$1 Million PLUS weekly and monthly prizes. So, why not turn your airport shopping into something even more rewarding? Whether picking up last-minute travel essentials, finding the perfect gift, or treating yourself before takeoff, enter today and be in with a chance of becoming a SYD Millionaire. Eligibility restrictions apply, see full terms and conditions. Learn more Sydney International Airport has three terminal buildings. Terminal 1 (T1) is the building dedicated to international flights, whereas the other two terminals (T2 and T3) handle flights from and to domestic and regional destinations. While the two domestic terminals are to be found close to each other, linked via a passageway, a runway separates the domestic terminals from T1. Thus, passengers can't walk their way from the international to the domestic terminals and vice versa. Sydney Kingsford Smith airport terminal 1 (T1) is the one handling international flights. It was built in 1970. However, it underwent numerous expansions and renovations from its construction. It lies on the northwest side of SYD Airport and is the biggest terminal of the complex. It features 25 gates, 200 check-in counters, and eight lounges. T1 is spread over three levels. The Ground level houses the Arrivals, the First Floor hosts the Departures, and the Third level is where offices are to be found. Moreover, it has two piers. Pier B serves Qantas, Oneworld airlines, and the air carriers that are members of the Skyteam (apart from Delta Air Lines). On the other hand, Virgin Australia and its partners (Delta Air Lines as well), along with Star Alliance members, arrive and depart from Pier C. Explicitly, the following amenities are available to passengers traveling from and to Sydney airport terminal 1: Retail stores Drinking and dining facilities Duty-free areas Pet relief areas Luggage storage (Level 1) Sydney airport hotel (Aerotel) - Arrivals hall Lounges Medical Center (Level 3) Meeting rooms Prayer room (Level 3) Free Wifi Information desks (Levels 1 and 2) Lost & Found Meeting points (Arrivals level) Showers (Level 2) VIP rooms Family services - Play areas (Gates 10, 50, and 53) Travel agency (Departures level) Sydney airport terminal 1 remains closed from 11:00 pm to 03:00 am. Sydney Kingsford Smith airport terminal 2 is the largest domestic terminal of Sydney Airport. It is to be found on the northeast side of SYD Airport and handles the domestic flights of various airlines such as Fly Pelican, Jetstar, Rex Airlines, and Virgin Australia. It has 26 gates and two levels. The Ground level houses the Arrivals, and the First floor the Departures. In detail, Sydney airport terminal 2 (T2) ensures a pleasant traveling experience for its passengers, featuring the following services: ATMs Currency exchange Lounges Baggage storage (Level 1) Free Wifi Information desks (Level 1) Lost & Found Parents' rooms Numerous shopping options Restaurants-bars-cafes Duty-free Outdoor smoking areas Sydney airport terminal 3 is also a domestic terminal. However, it is smaller than the other SYD domestic terminal (T2). In fact, it is the smallest of the three Sydney airport terminals. It has 19 gates and mainly serves Qantas domestic flights. It lies adjacent to T2 and houses the Arrivals area on its Ground floor and the Departures on the First level. Sydney airport terminal 3 might be the smallest SYD terminal, but it still offers all the necessary services and amenities. Thus, passengers departing or arriving at T3 can benefit from the following facilities: Retail stores Dining facilities Duty-free Baggage storage (Level 1) ATMs Free Wifi Family facilities Lounges Telephones Outdoor smoking areas Sydney airport terminals 2 and 3 are closed from 11:00 pm to 04:00 am. Transferring between the domestic terminals couldn't be easier. The two Sydney airport terminals (T2 and T3) lie right next to each other. Thus, passengers can walk from T2 to T3 and vice versa. As a matter of fact, they need about 7 minutes to transfer from one terminal to the other, following the passageway that passes through the Car Park P2 or the train tunnel link, as T2 and T3 share an underground train station. That being said, traveling from the domestic terminals to the international terminal (T1) and vice versa is more time-consuming and entails more hassle. Verily, a runway separates Sydney airport terminal 1 from the other two terminals. As a result, passengers have to opt for a train, bus, or taxi ride to reach their destination. In detail, transfers between terminals to passengers with reduced mobility. Our Tip: Qantas offers transfer services to transit passengers with an onward Qantas flight as well. Indeed, Qantas Seamless Transfers guarantee hassle-free transit between Sydney airport terminals to passengers who are entitled to that privilege. Sydney International Airport has three terminal buildings. T1 is the terminal handling international flights. On the other hand, the other two Sydney airport terminals (T2 and T3) are dedicated to domestic flights. The Sydney airport domestic terminals (T2 and T3) are adjacent to each other. Thus, passengers can get from one terminal to the other on foot. In fact, T2 and T3 are within a 7-minute walking distance from each other. The two domestic terminals of Sydney Airport are located within walking distance of each other. Conversely, the international terminal (T1) is situated further away from T2 and T3. Thus, the transit from T1 to the domestic terminals can be made via the complimentary T Buses, the Airport Link Train, or the airport taxi. Generative AI demos. Answers to your usage rights questions. Our original video podcast covers it all—now on demand.Watch Now The Sydney Airport is visited by over forty million visitors each year. This is partly why the airport is divided into three major terminals, each with their own concourses. Each of the Sydney terminals serves a particular function as they house certain airlines. For instance, the first terminal is considered the International Terminal Sydney Airport. This is because it mainly operates international flights and houses international airlines. The other two terminals also serve important functions in that they operate regional and domestic flights and serve hubs for Australia's biggest airline companies. Inter-terminal transportation Inter-terminal transportation is both possible and accessible. There are many options to choose from, and they include public buses, airport shuttles, taxis, and the Link Train. The timings, fares, and durations of each option differ, and you simply have to choose the one that best fits your needs and wants. For example, the T-bus is completely free of charge, but takes around ten minutes. It also only transfers passengers between the first and the second terminals. Meanwhile, the Link Train passes by all three terminals, and the average duration of each trip is around a couple of minutes. However, passengers are required to pay per ticket. It is also worthy to note that the first terminal is located farther away from the second and the third terminals. This means that while walking is usually the preferred method of transferring between the second and the third terminal, it is not plausible between the first terminal and either of the other two. The gates of the terminals at Sydney Airport The Sydney terminals each have their own concourses. Each concourse has a set of gates that it houses, and the distribution is as follows: The first terminal contains two concourses, B and C. The former houses the gates numbered 8 to 37, and the latter houses gates numbered 50 to 63. The second terminal contains two concourses, A and B. The former houses gates numbered 31 to 48, and the latter houses gates numbered 49 to 59. The third terminal contains all of its gates in the Departures Hall, and they range from gate one to gate nineteen. Airlines at each of the Sydney terminals As mentioned earlier, the terminals at the SYD each serve certain functions as they operate specific flights from particular airlines. The first terminal is deemed the International Terminal Sydney Airport. Some airlines operating at this terminal include: AIRASIA x Air India Xiamen Airlines The second terminal is the domestic airport terminal, and it is a hub for Virgin Australia. Other airlines operating at this terminal include: Japan Airlines (JAL) Jetstar Airways Link Airways The third terminal is the Sydney Qantas Terminal, as it is the hub for Qantas Airlines. This terminal also mainly serves domestic and regional flights. Other than Qantas Airlines, Emirates Airlines also occasionally operates from this terminal Sydney Airport Terminals map Since this airport is, in fact, the largest in the region, it may be beneficial to get acquainted with its layout before visiting it. This helps in avoiding wasting any precious time. To get a better idea of the layout of the terminals in the airport and how they are situated relative to one another, click here for a Sydney Airport Terminals map. Services at the terminals The host of restaurants, café's, bars, and lounges at the Sydney terminals are truly impressive. But they're not the only facilities that are available. You can also look for the observation decks at your terminal, the Heritage Museum at Terminal 3, the prayer rooms at Terminal 1, and the children's cinema at that same terminal! Some other facilities include the medical center, the pharmacies, the showers, and the Lost and Found Offices amongst many more! And don't forget to check out the high-end stores and the Duty-Free stores for some last-minute shopping. Sydney Airport is the busiest airport in Oceania, serving destinations all over the world. Use our map to find your way around the airport. Map & downloads Airlines & Terminals Car rental Flight deals Download as PDF Food Bus Train Security Parking Car rentals Hotel Sydney Kingsford Smith Airport (SYD), also simply referred to as "Sydney Airport" is the main international airport serving Sydney, the most populous city in Australia. It is the busiest airport in Oceania and the 48th busiest airport in the world. It serves as a primary hub for Australia's national flag carrier, Qantas. It also serves as a secondary hub for Virgin Australia and Jetstar. It is responsible for servicing 46 domestic and 43 international destinations directly. Sydney Airport: Terminal and gate map The airport has three terminals. They are named Terminal 1, Terminal 2 and Terminal 3. Terminal 1: Also known as the International Terminal. It serves all international flights. It is located in the northwestern area of the airport complex. It has two piers: Pier B: Gates 8-10, 24-29, 30-37. Used for Qantas, Oneworld, SkyTeam (except Delta Air Lines) members. Pier C: Gates 50-63. Used by Virgin Australia and its partners (including Delta) and Star Alliance. Terminal 2: Located in the airport's northeastern section. Serves domestic destinations. Terminal 3: Located in the northeastern section adjacent to Terminal 2. Serves flights under the Qantas and QantasLink banner. Transfers between terminals Terminal 1 and Terminals 2, 3 are located a short ride away from each other. It is not possible to walk between Terminal 1 and Terminals 2 and 3. There are several ways to transfer between terminals, depending on your needs. Terminal Transfer Bus is free. It runs every 15 minutes. Transit time is 10 minutes.Airport Link is a train service that runs between Terminal 1 and Terminals 2 and 3.Transit time is 2 minutes. Fares cost an additional charge.Rideshare services are available outside each terminal.Taxi ranks are located outside each terminal.Sydney Bus Route 420 runs between Terminal 1 and Terminals 2 and 3.Bus stops are located outside of the Arrivals level at each terminal.
