

How to share android screen on tv

[Continue](#)

The big technology to look at these days is the many different kinds of TV streaming services available to you, and it can be tough to figure out which one is the best. Android TV is a popular form of getting more channels and entertainment options in your home, and there's plenty of reasons why. I'm going to talk about what Android TV offers, as well as why you should consider making use of it. Personally, I have it in my home - I couldn't be happier with the sheer amount of options I have when it comes to watching TV. It's not for everybody, though! That's why I felt it was necessary to write this piece. - Scroll down to continue reading article - - Scroll down to continue reading article - What Is It? If you have an Android phone, picture a cable box that is running on the exact same operating system. Android does a great job of providing the user with stellar performance, but that's not all a potential consumer is looking at; the selection of movies and shows is important as well. Android TV was introduced to the world in 2014, allowing you to interact with your television in a way you never thought possible. It can be built into TV's, but there's also an external box format that many people use as well. An Android TV box allows you to implement the Google Play Store to download apps and other services (like Netflix or Hulu) - it even goes as far as allowing you to download games on your television. - Scroll down to continue reading article - - Scroll down to continue reading article - Voice search is also implemented, allowing you to look up any sort of video you'd like without raising a finger. This is perfect for not only people who are disabled, but it's also ideal for those that are just plain lazy (and there's nothing wrong with that). If you love Netflix and wouldn't mind having it seamlessly implemented into your television routine, Android TV is the best device to be using. - Scroll down to continue reading article - - Scroll down to continue reading article - Is It Expensive? This is the best part: as compared to many other cable/FIOS providers, it's relatively cheap. Expenses can build up when you're using a satellite or cable provider, especially when it comes to watching pay-per-views and shows of that nature. With Android TV, you can pretty much stream with ease from your phone; whether it's YouTube or the internet, you'll be able to watch whatever you like. When you take into account that there are so many different apps and other services to use alongside Android TV (and in many cases, free of charge), it's a deal and a half! - Scroll down to continue reading article - - Scroll down to continue reading article - I haven't had a large cable bill to complain about in months, and I have Android TV to thank for that. If financial stability is something you're keen on, as it should be for just about all of us, Android TV can cut your current entertainment bill right in half. I mean, that's not a promise; but it could happen! - Scroll down to continue reading article - - Scroll down to continue reading article - Joining the Movement A lot of people have an Android TV box these days so that just goes to show how convenient it can be for everyday use. Why would so many people use it in their homes if the entertainment value wasn't there? I was skeptical at first, much like you might be; but after using it for myself, I realized the potential was there. Ever since then, I've been using Android TV seamlessly. It seems like regardless of what I want to watch, I can do exactly that with this nifty little invention. Joining the movement could very well be the best thing you've ever done!
