The focus on the top championships and top matches is another USP that we think puts the spotlight on the best games with the best odds. And in case you dont find the odds high enough, there is a separate section where you can bet on games with enhanced odds. This is only available to mobile app users. Some of the best features of the 22BET mobile app are: Large selection of sports, casino games, slots, and other gambling formatsLive betting and resultsJackpot feature for soccer tournamentsLongterm bets option100% welcome bonus 22BET has developed its apps the same way as its websites. We couldnt find a single difference (other than the promotions) between the two. But there is definitely an advantage if you use the app because you get bonuses and also faster load time. Why depend on your browser when the platform itself provides an official app? Apart from easy navigation and abundant options to choose from, there are some critical website features we would like to highlight: Ability to change time zone and languageOdds format changeBet slip visibilityQuick bet slipThese are also available on the mobile site on the right-hand side menu. We think its a great addition to an already great website that puts betting at the forefront. Only if you are interested in the casino and other games do you have to check them out. Otherwise, you can focus on your bets and strategy. While a blog and tips section would have been nicer, we cant really complain This is because 22BET takes its new users into consideration and provides a FAQ-type information section at the end of the homepage. This is only available in the desktop version. Pro Tip If you are unable to use the mobile app, we recommend exploring the site on a desktop machine before registering. This way you can learn how the bet placing works and about other features. 22BET does not have many defining features other than the jackpot facility and ease of play. But in most cases, punters are looking at these two features only. However, it is our duty to inform you that we are not very satisfied with its security stance. Being on a free SSL certificate is fine for a blog but when you are handling personal and financial data. Moreover, the fact that it is not affiliated with any Nigerian agency also seems problematic. While you may not lose your money, we were unable to trace the history of 22BET.
